

ACADEMIC NEWSLETTER

BHIMS

FRIENDS

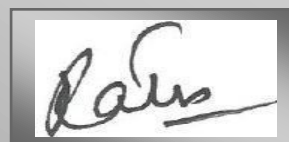

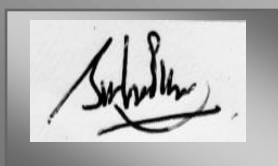

It is a great pleasure for us to publish the 3rd issue of the “**BHIMS Academic Newsletter**” of the Bombay Hospital Institute of Medical Sciences.

The year 2022 has been eventful and slowly we have all recovered from the COVID times and normalcy of work has resumed.

As you can see from the Newsletter, there have been many outstanding performances, awards, accolades, scientific publications, and presentations from various departments. Three BHIMS students from Neurology, Obstetrics and Gynaecology and Cardiology have secured the **First Ranks** in Maharashtra University of Health Sciences and we are indeed proud of all the achievers.

While we look upon 2022 fondly, let us make all efforts to make 2023 scientifically and clinically satisfying.

Best wishes for 2023.

Congratulations!

Awards /Honours/Achievements

Founding of *International Association of TransVoice Surgeons*

*I am very honored to be part of an unprecedented endeavor to improve the quality of voice feminization. After two days of sharing knowledge, the World's renowned laryngologists and voice surgeons from around the globe found the **International Association of TransVoice Surgeons** on June 11, 2022, in Berlin, Germany. Founding members are Phonosurgeons spanned from South Korea to Colombia and from Finland to India. Prof. Markus Hess is the elected president of the association. Board members are Hyung-Tae Kim, Korea; Chadwan Al Yaghchi, UK; Ahmed Geneid, Finland; **Nupur Kapoor Nerurkar, India**; and Juan-Carlos Casado, Spain. Professional training and research on voice feminization and voice deepening is the primary goal of the association. Emeritus Professor Juergen Wendler, who invented the glottoplasty technique that is nowadays the widely performed surgical method for voice feminization, attended the inauguration.*

New Happenings in BHIMS

Neuro muscular electrical stimulation (NMES) is a non-invasive modality designed for muscle strengthening and muscle recruitment to rehabilitate the swallow.

Vital-Stim is a state-of-the-art equipment, which uses NMES and S-EMG to aid in dysphagia rehabilitation. Vital Stim therapy in adjunct with traditional swallow therapy is proven to be safe and effective in patients with dysphagia. It accelerates the recovery time and helps patient become tube independent.

Bombay Hospital Voice and Swallowing Centre now has the Vital Stim equipment for swallowing therapy.

Ms. Zainab Nagree, Voice and swallowing therapist at the Bombay Hospital Voice and Swallowing Center, is a certified NMES therapist.
